

Benjamin Todd Greenhagen

Geophysics and Planetary Geosciences Group
Jet Propulsion Laboratory, Caltech
4800 Oak Grove Drive MS 183-301
Pasadena, CA 91109-8099

T: 818.354.0835
C: 626.298.4048
F: 818.393.4445
E: Benjamin.T.Greenhagen@jpl.nasa.gov

EDUCATION

University of California, Los Angeles, CA (2005 – 2009)

Ph.D. in Geology (Planetology) (2009)

- Advisor: Dr. David A. Paige
- Dissertation title: “Thermal Emission Remote Sensing of the Moon: Design and Development of Diviner Lunar Radiometer Compositional Capabilities”

Washington University, Saint Louis, MO (2003 – 2005)

M.S. in Earth and Planetary Science (2005)

- Co-advisors: Dr. Bradley L. Jolliff and Dr. Raymond E. Arvidson
- Thesis title: “Infrared and Raman Spectroscopy of Mg Sulfate and Basalt Mixtures as Martian Regolith Analogues”

University of Minnesota, Minneapolis, MN (1998 – 2003)

B.S. in Geophysics (2003)

B.S. in Geology (2003)

- Minors: Astrophysics and Physics

ACADEMIC RESEARCH EXPERIENCE

University of California, Los Angeles, CA (2005 – 2009)

GRADUATE STUDENT RESEARCHER, Dept. of Earth and Space Sciences, under Dr. David A. Paige
Designed and developed the 2009 LRO Diviner lunar radiometer Compositional Investigation including selection of three channels’ passbands, instrument performance modeling, and pre-flight calibrations. Participated in a wide range of Diviner related science planning and operations activities. Conducted laboratory thermal infrared reflectance and emission experiments on lunar analog minerals. Pursued research on remote sensing of planetary surfaces.

Washington University, Saint Louis, MO (2003 – 2005)

GRADUATE RESEARCH ASSISTANT, Dept. of Earth and Planetary Science, under Dr. Bradley L. Jolliff
Laboratory studies of Mg sulfate and basalt mixtures. Performed temporal experiments to observe sample desiccation and sulfate crust efflorescence. Measured samples using thermal infrared reflectance spectroscopy, Raman spectroscopy, and X-ray diffraction.

University of Minnesota, Minneapolis, MN (2001 – 2003)

UNDERGRADUATE RESEARCH ASSISTANT, under Dr. David L. Kohlstedt

Designed and wrote image processing software to determining melt content of deforming rock samples.

PROFESSIONAL RESEARCH EXPERIENCE

University of California, Los Angeles, CA (2009 – present)

SCIENTIST, Geophysics and Planetary Geosciences Group

Diviner lunar radiometer Compositional Investigation lead. Diviner observation sequence designer. Diviner flight data validation and analysis. Diviner calibration data analysis. Investigation of lunar surface composition at global and regional scales derived from Diviner data. Comparisons/collaborations with other lunar instruments and datasets. Investigation of the use of Diviner derived technology for other planetary surfaces.

University of California, Los Angeles, CA (2009)

STAFF RESEARCH ASSOCIATE, Dept. of Earth and Space Sciences, under Dr. David A. Paige

Development of data analysis tools for 2009 LRO Diviner lunar radiometer Compositional and Thermophysical Investigations. Diviner operational and science planning including the design of in-flight calibrations (commissioning and mapping orbit phases) and investigation of Diviner's targeting capabilities and collaborations with other lunar orbiting instruments. Analysis of Diviner pre-flight calibration data.

Aerospace Corporation, Chantilly, VA and El Segundo, CA (2002 – 2005)

MEMBER OF THE TECHNICAL STAFF, under Dr. Laurel E. Kirkland

Infrared remote sensing of field sites in the Mojave Desert, including Death Valley, Bristol Lake, mines in Arizona and Nevada, and adjacent areas. Planned and implemented field studies using truck mounted thermal infrared emission spectrometers. Analyzed ground-based and airborne remote sensing datasets. Designed and wrote software for rapid analysis of data in the field.

3M Corporation, St. Paul, MN (1999 – 2001)

LABORATORY ASSISTANT, under Dr. Robert K. Galkiewicz

Physical properties of mechanical fasteners. Prepared and tested fastener samples using tensile and shear strength testers. Wrote software to operate tensile strength tester. Created prototypes and mockups using fasteners.

TEACHING EXPERIENCE

University of California, Los Angeles, CA (2005 – 2006)

GRADUATE TEACHING ASSISTANT, Dept. of Earth and Space Sciences, under Dr. David A. Paige

Developed, wrote, and taught discussion section curriculum and exercises, collaborated on lecture curriculum and exams, met with students upon request, and graded student work

- ESS 10: Exploring Mars, The Red Planet (2 quarters)

University of Minnesota, Minneapolis, MN (2001 – 2003)

UNDERGRADUATE TEACHING ASSISTANT, Dept. of Geology and Geophysics, under Dr. Kent C. Kirkby

Taught discussion section curriculum, met with students upon request, and graded student work

- GEO 1001: The Dynamic Earth (4 semesters)

AWARDS AND FELLOWSHIPS

- Graduate Research and Teaching Assistantship, UCLA (2005 – 2009)
- Best Presentation Award, ESSSO Research Symposium (2007)
- Graduate Research Assistantship, Washington University (2004 – 2005)
- NASA Space Grant Fellowship, Washington University (2003 – 2004)
- Undergraduate Research Opportunity Program Fellowship, University of Minnesota (2001 – 2003)
- Lunar and Planetary Institute Scholarship, LPI Summer Intern (2002)
- Geology Field Camp Scholarship, University of Minnesota (2001)
- Iron Range Scholarship, University of Minnesota (1998 – 2000)
- 3M Richard G. Drew Recognition of Creativity Award (1998)

RECENT ACTIVITIES

- President, GSA Math and Physical Sciences Council, UCLA (2007 – 2008)
- MPSC Representative, Graduate Student Association Forum, UCLA (2006 – 2008)
- MPSC Representative, GSA Appointments Board, UCLA (2006 – 2008)
- Dept. of ESS Representative, Math and Physical Sciences Council, UCLA (2006 – 2008)

COMPUTER RELATED SKILLS

Computer Languages

- C/C++, IDL, Matlab, UNIX Shell, HTML, Fortran

Computer Programs

- ENVI, MS Word, MS Excel, MS PowerPoint, Adobe Photoshop, Adobe Illustrator

PUBLICATIONS AND SELECTED PRESENTATIONS
